DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 4, 7, and 12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Combs (US 5,699,809). Combs discloses a device and process for analysis of acoustic reflectance of the ear to diagnose various ear pathologies. These pathologies include otitis in its various forms such as purulent and non-purulent (which comprises serous and mucoid) (abstract, col. 1 line 30-33). Combs comprises a device that measures acoustic reflectance. A transducer generates sound waves typically in the range of 500 Hz to 20 KHz (not ultrasonic) which is directed into the ear and is reflected in part and interacts with the inner ear. The returning signal shape is analyzed and used to determine what type of disease, if any, the patient has, such as purulent otitis media and non-purulent otitis media (serious otitis media and mucoid otitis media) (col. 2 line 19-65, col. 4 line 56-59, col. 5 line 39-44).

Allowable Subject Matter

4. Claims 14-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 7, 8 and 12 are allowed.
